

Continue to practise safe management measures after vaccination

Masks for you, sir?
Only \$5 a box.

No.

I have just been vaccinated,
which means I need not
wear a mask any more.

RIP!

COVID-19 vaccination protects you and your loved ones.

The more people vaccinated, the safer we will be. But even with vaccination, we should continue to observe safe management measures and practise good hygiene.

Let's keep vigilant and be socially responsible. Remember to

Could you please stand
one meter away from
me in this queue?

I'm vaccinated. I have
low risk of catching
COVID-19.

So? Low risk
doesn't mean no risk!

- Wear a mask when outside your home and use the TraceTogether app/token

- Practise safe distancing and good hygiene

- See a doctor if unwell and stay at home

For more information, visit vaccine.gov.sg or call **1800-333-9999**

That is why wearing
a mask is still a must,
or you'd be fined.

Enforcement Officer
coming!

AHH! Okay, here's \$5!

It's now
\$25.
